

I strongly, and respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I, and other XM subscribers, demand and deserve.

Because I am a sales representative that lives in South Dakota and work in Wyoming, Montana, and Colorado (and often, other states), I spend 4-5 days a week traveling away from home where I am unable to receive regular radio signals, I benefit from listening to XM Satellite Radio and its traffic and weather channels. XM satellite radio provides important information, variety, and quality; when and where I need it, which is not available elsewhere. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear.
